Where: City of Eau Claire

Who: Civil Engineering Students

Application Deadline: February 9th, 2020

**Full job description and application at
www.eauclairewi.gov/jobs.**

Questions: Call 715-839-4921

Most interesting part?

"The most interesting [part] about interning here is learning what goes underneath every single city street. Seeing the water main, sanitary, and storm sewer pipes that go into the ground amazed me."

- Engineering Intern

Benefits of the internship?

"I gained people skills, like talking to an unhappy homeowner...and I have contacts and references for future jobs and careers I may pursue."

- Engineering Intern

Favorite part?

"My favorite part of this internship was that I was outside all day learning each and every day. I could ask endless amounts of questions to the engineering technician and would always get a satisfactory answer."

- Engineering Intern

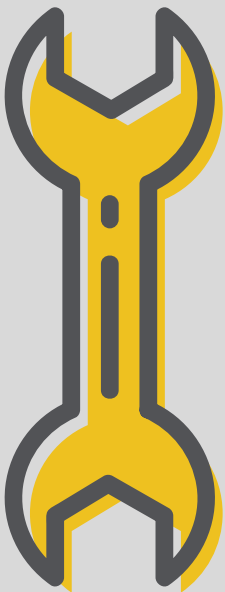

Typical day?

"A typical day, once job projects started, had me on jobs sites all day. Each and every day I would be with the different construction crews. With these constructions crews I would keep track of any materials that were used by them and then I would make daily reports at the end of the day."

- Engineering Intern

What did you learn?

"One thing that I learned through this internship that I will carry with me is that you get to work with many different types of people. Not only do you get to work with engineers, but you also work with laborers and foremen. You get to meet and work with all different types of people and that is something that you do not realize in your schooling."

- Engineering Intern
